## TRADE-MARK IS YOUR GUARANTEE OF QUALITY

### ROSCO SNOW FENCE

Rosco Snow Fence is made from the finest products and is engineered to "stand up". Ideal for supplementary grain storage.

### ROSCO WELL CURBING

Rosco Well Curbing is designed to keep out seepage and prevent cave-ins. Built of corrugated steel, it is easily installed and will last a lifetime.

### ROSCO GALVANIZED ROOFING & SIDING

Like the aluminum, it stays "Weather-tight" . . . provides "balanced" water load.

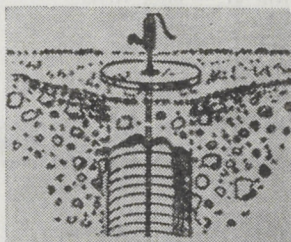

### ROSCO CULVERTS

There is a Rosco Culvert for every drainage requirement . . . made of heavy gauge copper bearing steel for longer life.

### ROSCO ROAD SIGNS

A Rosco Road Sign for every highway, city and town requirement. Easy to erect . . . clearly visible . . . longer lasting.

### ROSCO ALUMINUM ROOFING & SIDING

Economical, lasts for life . . . easily handled and applied . . . fire resistant . . . available in a variety of sheet lengths.

### ROSCO EAVESTROUGHING & RAIN SPOUTS

A dependable product manufactured from highest quality materials to last a lifetime.

Lethbridge, Alberta

# STOP EROSION— INCREASE YIELDS

WITH  
**NOBLE**  
MODEL MN2  
**CULTIVATOR**

*In Twin Hitch*

## FOR LARGEST WHEEL TRACTOR

USED SINGLY  
CUTS 7FT.  
IN DEEP TILLAGE—  
OR TOGETHER WILL CUT  
14 to 16FT.  
IN NORMAL TILLAGE

- Leaves more stubble on the surface than any other implement, for greater security.
- Returns some buried stubble to surface where covered excessively by the one-way.
- Increases yields with heavier, more evenly distributed stubble mulch.
- Cuts everything — no skips with wide sweeps.
- Can be equipped with chisels for deep chiselling.
- Utmost flexibility with Twin Unit Hitch.
- Better clearance — Fewer stops — More miles per day.

*Write for full information, giving soil type and tractor power*

# Versatile Self-Propelled Swather

12' - \$1875. FOB Nobleford

15' - \$1975. FOB Nobleford

## VERSATILE

You unquestionably want the best self-propelled swather you can get for your money. Then you will be interested in the modern "Versatile". You will also be interested in the "Steer-O-Matic" transmission that makes steering with a steering wheel as simple as operating your car. You want to lay a good swath! — then look at the Versatile with variable speed on each canvass. You want a machine that never has to have its canvasses tightened, then see this highly developed and superbly designed "Versatile" self-propelled swather.

This machine is manufactured in the 12 and 15 foot size. This field tested and proven "Versatile" swather allows farmers to get the most from their crops because of its low working angle of 22 degrees on the table and the use of the highly successful centre delivery system (combined with variable speed canvasses). These features make it possible to lay a perfectly criss-crossed windrow that is uniform, light and fluffy, insuring good drying in the shortest time.

The Versatile has a convenient two-lever hydraulic control. The operator can either lower or raise the reel alone or raise and lower the reel and platform at the same time. All operating controls are easy to reach from the comfortable hydraulic seat situated on a large roomy three-foot by four-foot operator's platform.

See your Versatile dealer — see him FIRST if you want the best deal but don't have time to shop around, or see him LAST if you still want to shop around and convince yourself. Either way you can't lose.

## DO YOU WANT A PROFIT ON YOUR CATTLE?

You can have a profit on your cattle just by giving them a chance to make you a profit.

The RICH-BERN INSECTICIDE APPLICATOR will give your cattle the chance they need to give you a profit. Most Cattlemen agree that spraying cattle stops them from gaining weight for a period up to thirty days. Not only that, but, more often than not, rain has washed off most of the sprayed chemical before the thirty days are over, so you gain not a single pound by spraying.

Before you spend money for spraying or buy a sprayer or a so-called top-fed oiler, take a good long look at the RICH-BERN INSECTICIDE APPLICATOR and see for yourself why your cattle should have one.

## RICH-BERN APPLICATORS

are made in  
LETHBRIDGE, ALBERTA

## RICH-BERN MANUFACTURING CO.

505 13th Street North

Lethbridge, Alberta

## A PICTURE OF CONTENTMENT

Pick out a Wik Applicator owner—one who recently switched from another method of applying insecticide to his cattle — and ask, in a comparative kind of way, about Wik's method of perpetual control of insects. Easier and cheaper than spraying? Quiets, rather than excites cattle? Controls lice in winter as well as flies in summer? We'll bet you get 10 per cent "YES" answers. Because we know for a fact that WIK is built to do the job. Wik has proved to thousands of cattlemen all across Canada that it gives their cattle the best insect control they ever had!

What's the secret? Treatment every day the year around with WIK Insecticide in a manner as natural to cattle as is chewing their cud. Only WIK does this. INVESTIGATE THE WIK APPLICATOR AND SEE WHAT WE MEAN. OVER 400 DEALERS SERVING YOU ACROSS CANADA.

***The Wik Applicator Co. of Canada***

**PREPARATION**—Check your machine ahead of time to avoid disappointment when sewing time arrives. Call the Comrie Sewing Machine Company for a free service call.

Plan your wardrobe sensibly to have suitable garments for all your needs.

Select your pattern before buying your material and be sure to allow extra material for matching plaids, checks and large florals.

Check material for shrinkage and use the hot iron test to insure satisfactory laundering and dry cleaning.

Alter pattern before cutting so that pattern balance is obtained throughout assembling of garments.

Follow chart enclosed in pattern envelope so that economy is practised in cutting, being careful to follow instructions printed on each pattern piece for straight of fabric and for parts cut on the fold of material. Follow chart for assembling garment and in doing sewing details shown on each chart.

**SPECIAL HINTS**

Use correct size thread and needle for material used. Always use same size thread on the top as used in the bobbin.

Press as you sew—never stitch over an unpressed seam.

Tie ends of threads, or reverse sew a few stitches and trim ends of threads for a neater finish.

Press hems before sewing.

Stitch straight seams and even corners—if you need practice try stitching without thread, around squares and circles drawn on a piece of paper.

Incorporate your own design whenever possible to lend individuality to your wardrobe.

For smartly tailored draperies, a zigzag sewing machine saves you time and gives a truly professional finish at minimum cost. Zig-zag sewing machines are ideal for stitching plastics—the zigzag stitch prevents cutting and gives longer wear.

## PRODUCING HIGH QUALITY MILK

High quality milk is pleasing, wholesome and meets legal composition and sanitary requirements.

**Palatable Milk:** Milk should have a pleasant, sweet taste; a faint pleasant aroma and leave a desirable taste sensation in the mouth after it is swallowed. It must not have any objectionable flavor or odor. Milk that leaves an unpleasant taste in the mouth has a flavor defect.

Milk consumption depends very largely upon its good flavor. Some adults do not drink milk because at some time earlier in life they drank milk with an objectionable flavor or odor and thus have developed a dislike for it. Consumers will pay high prices for products that please their taste and will consume such products in large quantities even though they may have very little, if any, food value.

For example, compare the price and sales of quarts of milk with that of 12-ounce bottles of beer, packages of cigarettes, chewing gum and six to seven-ounce bottles of soft drinks. On the other hand, people will not pay a good price for products that have objectionable flavors, regardless of their food value. As an illustration, let us compare the relative price and food value of mutton and beef. Mutton has essentially the same food value as that of beef. Many people object to the flavor of mutton and, as a result it generally sells for a comparatively low price.

Many dairymen do not realize that the milk they produce may have an objectionable flavor or odor. They work in a certain barn atmosphere, consume their own milk day after day, as a result, they develop a tolerance for the flavor of their milk which to them may not be objectionable; whereas, the public may object seriously to the same flavor and odor.

Some dairymen have the mistaken idea that their milk must be good if their equipment meets the sanitary requirements of the dairy inspectors, their cows are free from disease, are properly cleaned, the milk is handled in clean utensils and properly cooled to hold down the bacteria count. It is a well known fact that milk may be produced under the most sanitary conditions, have a low bacteria count and still have an objectionable flavor that is not acceptable to the consumer. There is practically no relation between bacteria count and milk flavor except when the bacteria count is in the millions. Then the bacteria may impart objectionable odors and flavor. Investigators agree that the consumption of dairy products can be greatly increased if milk and other dairy products have the kind of flavor the consumers demand.

**Wholesome Milk:** Milk to be wholesome must be produced from clean, healthy cows and handled by men who have no transmittable diseases. The milk must have a low bacteria count and be free from disease producing organisms. No appreciable amount of sediment is found in good milk.
